INTRODUCTION

PortfolioGenie is an AI-powered web application that helps developers create professional portfolio websites quickly. By analyzing GitHub projects and using AI to generate optimized content, it simplifies the portfolio-building process and produces a modern, deployment-ready portfolio.

THE PROBLEM

Many junior developers have strong technical skills but struggle to create professional portfolios because:

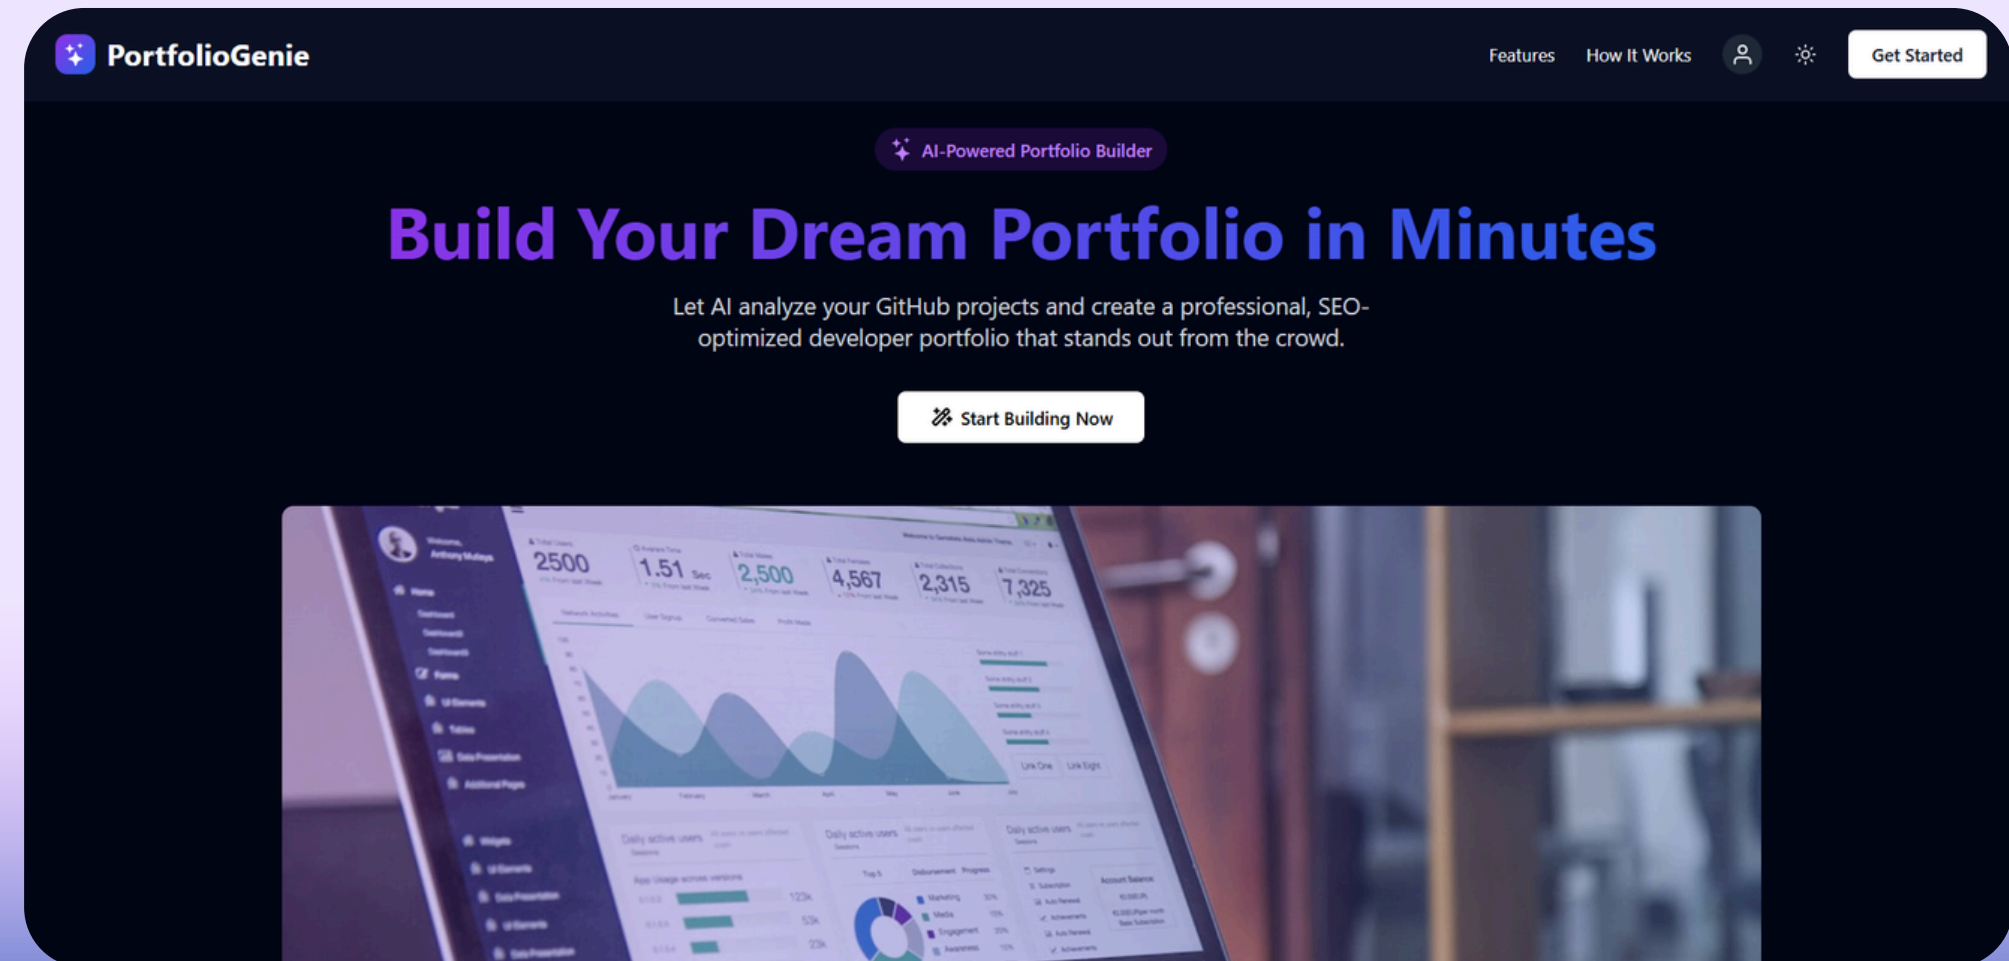

- Building a portfolio requires design and writing skills.
- Writing project descriptions is time-consuming.
- GitHub repositories are difficult for recruiters to evaluate directly.
- Creating a portfolio from scratch takes significant effort.

OUR SOLUTION

PortfolioGenie automates portfolio creation by:

- Connecting to GitHub repositories
- Analyzing project data
- Generating AI-powered content
- Creating professional portfolios
- Exporting portfolio one page code

AUTHENTICATION

PortfolioGenie includes a secure authentication system for managing user accounts.

Key Features:

- User registration and login
- Secure account access
- User session management
- Input validation for better experience

AUTHENTICATION

Simply connect your GitHub account and let AI do the heavy lifting

E-Commerce Platform

React, Node.js, MongoDB

Task Management App

TypeScript, Express, PostgreSQL

AI Powered Section

How It Works

Three simple steps to your perfect portfolio

01

Connect GitHub

Link your GitHub account to analyze your repositories and contributions

02

AI Generation

Our AI processes your data and generates optimized content

03

Download & Customize

Preview, customize, and download your portfolio with ease

How It Works Section

GITHUB ENTRY

Let's Build Your Portfolio

Enter your GitHub username to get started. Our AI will analyze your repositories and generate professional content.

Connect GitHub Account

We'll analyze your repositories to generate your portfolio content

GitHub Username

 Generate

What we'll generate:

- SEO-optimized project descriptions
- Professional About Me section
- Skills summary from your tech stack
- Clean, exportable code

This is where the user inputs their GitHub Username, then their profile data and repositories will be fetched to be used in the portfolio

TECH STACK

Category	Technologies
Frontend	React 19, Vite, Tailwind CSS, React Router, Axios
Backend	Node.js, Express.js, PostgreSQL
Authentication	JWT, bcrypt.js
AI & APIs	GitHub REST API, Gemini AI API
Export & Tools	JSZip, FileSaver.js, ESLint, Nodemon

PROJECT ACHIEVEMENTS

- Responsive UI optimized for desktop, tablet, and mobile.
- Efficient GitHub API integration with fast data fetching.
- Optimized React state management for smooth performance.
- Real-time preview with instant rendering of changes.
- AI-generated professional and SEO-friendly portfolio content.
- Clean, scalable, and maintainable code architecture.

CONCLUSION

PortfolioGenie provides a fast and efficient way to create professional developer portfolios. By integrating GitHub with AI-powered content generation, it helps developers build, customize, preview, and export high-quality portfolios with ease.

Thank You!
